***Specification***

1. The specification is objected because it does not show the arrangement and the title of the disclosure.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

**Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) **TITLE OF THE INVENTION.**
- (b) **CROSS-REFERENCE TO RELATED APPLICATIONS.**
- (c) **STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.**
- (d) **INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC** (See 37 CFR 1.52(c)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or **REFERENCE TO A "MICROFICHE APPENDIX"** (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) **BACKGROUND OF THE INVENTION.**
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) **BRIEF SUMMARY OF THE INVENTION.**
- (g) **BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).**
- (h) **DETAILED DESCRIPTION OF THE INVENTION.**
- (i) **CLAIM OR CLAIMS** (commencing on a separate sheet).
- (j) **ABSTRACT OF THE DISCLOSURE** (commencing on a separate sheet).
- (k) **SEQUENCE LISTING** (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Drawings***

2. Figures 1, 3, and 7 are objected to under 37 CFR 1.83(a) because they fail to show legends designating numbers as described in the specification. Any structural detail that is

Art Unit: 2621

essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Honjo (US Pat. No. 6,006,007).

Regarding claim 1, Honjo discloses a method for storing a data stream comprising intra-coded pictures and intercoded pictures on a storage medium comprising at least one intra-coded allocation unit and at least one inter-coded allocation unit (see figures 1 and 2), the method comprising the steps of: a) receiving the data stream (see col. 2 lines 1-5); b) storing multiple intra-coded pictures in the intra-coded allocation unit on the storage medium (see figure 2, col. 2 lines 11-16 and lines 22-27); c) storing multiple inter-coded pictures in the inter-coded allocation unit on the storage medium (see figure 2 and col. 2 lines 16-17).

Regarding claim 2, Honjo discloses the data stream comprises further data other than coded pictures and the further data I stored in the intra-coded allocation unit (see col. 2 line 66- col. 3 line 10).

Regarding claim 3, Honjo discloses the inter-coded allocation unit is preceded by the intra-coded allocation unit and the inter-coded pictures stored in the intercoded allocation unit are associated with the intra-coded pictures stored in the preceding intra coded allocation unit (see figure 2 and col. 2 lines 10-15).

Regarding claim 4, Honjo discloses the steps of: a) receiving a trick play request for the stored data 9see col. 2 lines 49-58); and b) reading the data in the intra-coded allocation units to create the requested trick play stream of recorded data (see col. 2 lines 54-58 and claims 3 and 4).

Regarding claim 5, Honjo discloses data in the intra-coded allocation units are coded with a first coding algorithm and the data in the inter-coded allocation units are coded with a second coding algorithm (see claim 2, intra-coded picture and inter-coded picture are coded using two different coding method).

Apparatus claim 6 is rejected for the same reasons as discussed in method claim 1 above.

Regarding claim 7, Honjo discloses storage medium (see figures 1, 3, and 4) comprising a) at least one intra-coded allocation unit for storing multiple intra-coded pictures (see rejection of claim 1 above); and b) at least one inter-coded allocation unit for storing multiple inter-coded pictures (see rejection of claim 1 above).

***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claim 7 is rejected under 35 U.S.C. 101 because the claims are directed to a recording medium storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical “things” nor statutory processes. See, e.g. *Warmerdam*, 33 F. 3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. In addition a mere arrangements or compilations of facts or data, are merely stored so as to be read or outputted by a computer without creating any functional interrelationship either as part of the stored data or as part of the computing processes performed by the computer then such descriptive material alone does not impart functionality either to the data as so structured, or to the computer, and therefore are not statutory. See MPEP 2106.IV.B.1.
